McCLELLAN RANCH

15. Existing ranch buildings
16. Environmental classroom
17. Community garden plots
18. Rolling Hills 4-H facility

GENERAL AREAS

19. Restoration planting (throughout park)

Creek — New accessible trail — Existing nature trail

THE City of Cupertino has accomplished its 25-year-long quest to acquire the land in the Stevens Creek Corridor. Based on community input and study, the plans for the 60 acres are to:

- Create a new community park
- Return Stevens Creek to a more natural alignment
- Protect and restore the creekside environment and improve the habitat for steelhead
- Repair and enhance oak and native grass habitat
- Construct a fully accessible trail, new park and golf maintenance facilities, new rest rooms for golfers, and an environmental classroom at McClellan Ranch
- Remodel the pool and catering station
- Honor the history of the area through markers and educational exhibits

Action is being taken today to provide residents of Cupertino a beautiful and welcoming retreat in the heart of our urban environment. The Stevens Creek Restoration Park Project is the exciting next chapter in the history of Cupertino.
